Turnkey Solutions,  
Equipment &  
Services

**INDIV**<sup>®</sup>

[indiv.com](http://indiv.com)

**Turnkey solutions:  
When technology and  
service become one**

INDIV develops engineering, manufactures and supplies equipment and integrated systems for pig production, from a simple retail to a turnkey project.

**Founded in 1964, INDIV has an outstanding image in the international market supplying customers in Latin America, South America, the Caribbean, Africa, Asia and East Europe.**

**Global supplier with local service**

INDIV is an international prestigious brand as a poultry and swine industry equipment and systems manufacturer, from production to process. The addition of the turn key integral project and counting with those references it transforms it in an strategic support.

The expertise acquired has allowed us to develop as specialists in procedures, what places us in an ideal position to coordinate the contribution of a solid group equipment and systems suppliers fulfilling our own production.

We represent other reliable manufacturing companies of poultry and swine equipment, that recognize INDIV's important role as the main contractor for the turn key supplies in integral plants. All the productive and control processes required are fulfilled with their services and technological solutions, sharing an identical passion for excellence and quality.

From equipment and ventilation systems, including metal structures for barns -designed specifically for swine production- to the best customer service, INDIV is the best qualified professional partner for your project.

INDIV is based in the city of Springfield, Missouri, US, counting with production and marketing plants in Argentina and Mexico and offices in Colombia, Venezuela, Guatemala, Malaysia, Middle East & North Africa; and authorized representatives in several countries.

**INDIV+ROTECNA:  
Certified Quality**

**INDIV is ROTECNA Official Distributor** for its entire range of products and works together worldwide for turn key solutions.

Gestation

Farrowing

Nursery

Finishing

**ROTECNA** has the most extensive range of equipment manufactured exclusively for hogs farms, occupying a position of world leadership in the sector with a presence in over 70 countries.

This leadership is the result of constant innovation, own design and manufacture, **with recognized quality certified, ISO 9001:2000.**

The **INDIV - ROTECNA** facilities, translate into a more efficient production model, animal welfare and comfort, biosecurity and hygiene.

A simple metallic structure, designed and prepared for ventilation and feeding systems, built with the same quality standards of our products. Accessories for fans, cooling pads and other items installation are included in the structure.

The modular construction of INDIV barns allows quick and secure installation on site, ensuring the functionality.

**Drop Ceilings**

A drop ceiling made of thermal insulation reduces the volume of air to move and control. Also it improves the aerodynamics of the tunnel building, therefore improving air speed.

**Options:**

- Curtain + Cellulose
- Insulation membrane

Efficiency, control and profitability:  
The security of a system designed  
and programmed to measure  
customers' needs.

**An investment with fast return**

Proper air conditioning of the barns means more comfort and less stress due to extreme temperatures or lack of ventilation.

The result: an immediate increase in profitability for the optimal feed conversion

**COOLING PADS**

**MANUAL OR AUTOMATIC CURTAIN AND INLETS SYSTEMS**

**GESTATION / FINISHING**

**FARROWING / NURSERY**

**VENTILATION SETTING**

**CONTROLLERS**

**HEATERS**

Infrared heaters, pipe heaters, turbo heaters. Different reliable, clean and efficient options.

**ROTEM AC-2000 SE and AC 2000 PLUS**

Both summer and winter, AC-2000 automatically adjusts the ventilation system according to changes in temperature, humidity and static pressure.

The system takes into account the wind chill, the fan capacity, the minimum required ventilation and the temperature differential.

**ROTEM Piguard and Superguard**

Superguard and Piguard are two innovative products that work together to revolutionize the whole concept of environmental control of farrowing and weaners

The Superguard server-core stores the information of each Piguard installed in every room, controlling and regulating temperature and humidity.

**Technical Assistance**

The after sales service staff is ready to assist customers throughout the life of the product.

With most of the components produced by own manufacture or under our own management ensure the quality and availability.

**Electrical Panels**

Designed to measure and according to the functionalities required by ventilation and feeding controllers.

**FANS**

INDIV offer a wide range of fans for more efficient temperature control in pig production barns.
