# TURBOGROW2® Complementary Feeders

The newest and most innovative **complementary feeder** for automated poultry growing systems.

The **TURBOGROW2®** complementary pan is inserted between the automated pans, allowing larger circulation space at both sides, so the birds can feed from both pans.

The design – narrow and rounded in its front profile – creates a usable 100-cm perimeter, 20 % larger than a circular model.

Each **TURBOGROW2®** allows a density of between 75 and 100 birds.

## Main benefits

The best complementary feeder for transition to an automated pan.

Birds feed more comfortably and consume more feed.

Larger live weight at first week of age (>10 g).

Live weight increase – of 1.5 to 3% – at the end of the flock cycle.

Low feed waste.

Improves feed conversion.

Improves uniformity.

High sanitary level because birds do not feed from the ground and feed does not become contaminated.

Adequate 360-degree feed distribution.

Excellent feed accessibility.

Fast assembly and disassembly.

Easy to wash and store.

Placement of the **complementary pans** is recommended for chicks from **day 1 through day 12**, when birds reach the size that allows feeding from the automated pan.

## Feed dispensers

### TT-Feeler

Feeder for **TURBOGROW2®** pans

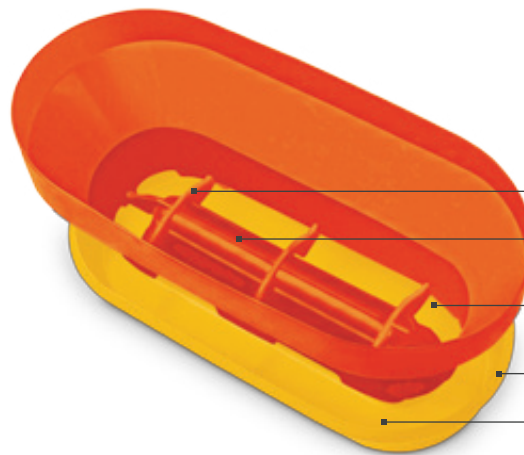

### Chickplus

For any type of metal tube.

Feed supply at 1.75" (4.5 cm) from the tube level. Recommended for placement when the maximum height from the ground to the tube is of 10.2" (26 cm).

## Design characteristics

- Thick and resistant support arms
- Exclusive reinforced and ergonomic assembly system
- 8 wide windows for feed distribution
- Internal wide lip
- W-shaped pan
